

# UNITED ASSOCIATION FOR **BIDEN** **HARRIS**

## Setting the Record Straight: Joe Biden on Natural Gas, Nuclear Energy, and Permitting

- Biden is committed to an all-of-the-above energy approach, with new investments in **nuclear, natural gas, and carbon capture** technologies.
- Natural gas plays a prominent role in Biden's energy plan to create jobs and power our economy.
- Under Obama-Biden, UA pipeliners worked more than **59 million manhours** – and three of the largest pipeline projects our members worked on in 2017 were permitted and approved by the Obama-Biden Administration.
- Biden will modernize the permit process for energy projects to **reduce delays and frivolous lawsuits from left-wing activists** - unlike Trump's haphazard approach that ends up with projects being overturned by courts.
- The Obama-Biden White House permitted and helped fund the **first new nuclear plant in over 30 years**. Biden will continue to develop our existing fleet and build new plants.

***"I will not ban fracking, no matter how many times Trump lies about it."***

*Joe Biden, 8/31/20 Pittsburgh, PA*

**ON ENERGY AND NATURAL GAS,  
THE BOTTOM LINE IS CLEAR:**

**BIDEN BACKS THE  
UNITED ASSOCIATION**
